# PATH GLOBAL

POSSIBILITY IS OUT THERE, ALWAYS

Path Global expertises in residence and citizenship by investment. Working alongside with renowned fund companies and real estate developers worldwide, Path Global offers customized immigration solutions.

## About Us

Path Global's Company Vision is to provide international accessibility and settlement services and to help all our clients find the most suitable programs. Our Professional Program Development Team consists of immigration lawyers, business and investment specialists to ensure the security, legitimacy and success rate of each program. Headquartered in the international financial hub Singapore, we expand our business area through cooperation with local expertise and also establish offices in Canada, the United Kingdom, Portugal, Greece, Turkey to facilitate our provision of hospitable services.

Executive Chairman*

## **Our Company**

---

Path Global starts out in Singapore, where international elites can fully unleash their talents. Through years of strenuous Research and Development, we examine immigration laws of every country and build our own immigration database, which in hence sped up our program development and our sophisticated program designs brought real benefits to our clients.

When we entered the industry many years ago, immigration was considered as a privilege to a few, as a decision of profound influence of no turning back. Nowadays, Residence and Citizenship Planning is all about the pursuit of personal achievement and financial flexibility. Born with an uncontrollable thirst for global mobility, we always need a Plan B.

As industries grow more and more specialized, we become conscious that opportunities are getting scattered around companies and individuals who have access to clients' growing need for residence and citizenship planning. The only barrier from helping the clients is the lack of professional knowledge and experience in operation of immigration programs.

Path Global's Expert Team dedicates to design immigration programs with comprehensive assessment and risk control. Professional interpretation of immigration laws and regulations allows us to work in compliance at an international standard. Due diligence are performed in order to guarantee interests of every party involved.
